

UPAS Supported Operating Systems

UPAS consists of **Console** and **Sensor**, using **MySQL Community** as the backend database. All components can be deployed on virtual machines (e.g., VMware, Hyper-V, etc.).

Component	Supported OS Versions	Notes
Console	Windows Server 2016 or later Ubuntu 24.04 (image-based installation)	Supports VM deployment
Sensor	Windows Server 2016 or later Ubuntu 24.04 (image-based installation)	Supports VM deployment
